Total Sales by Year

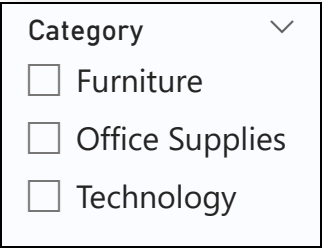

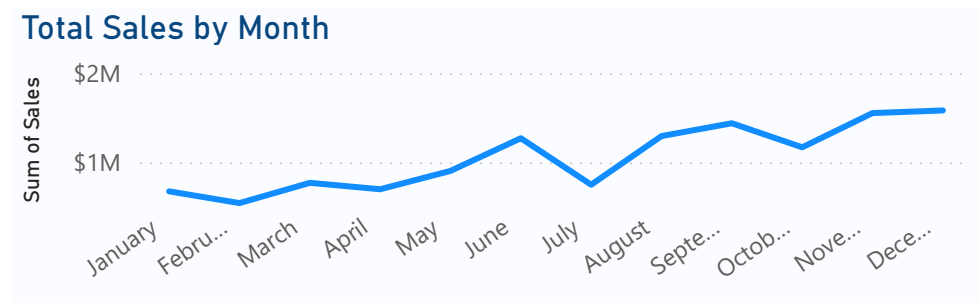

Total Profit by Category

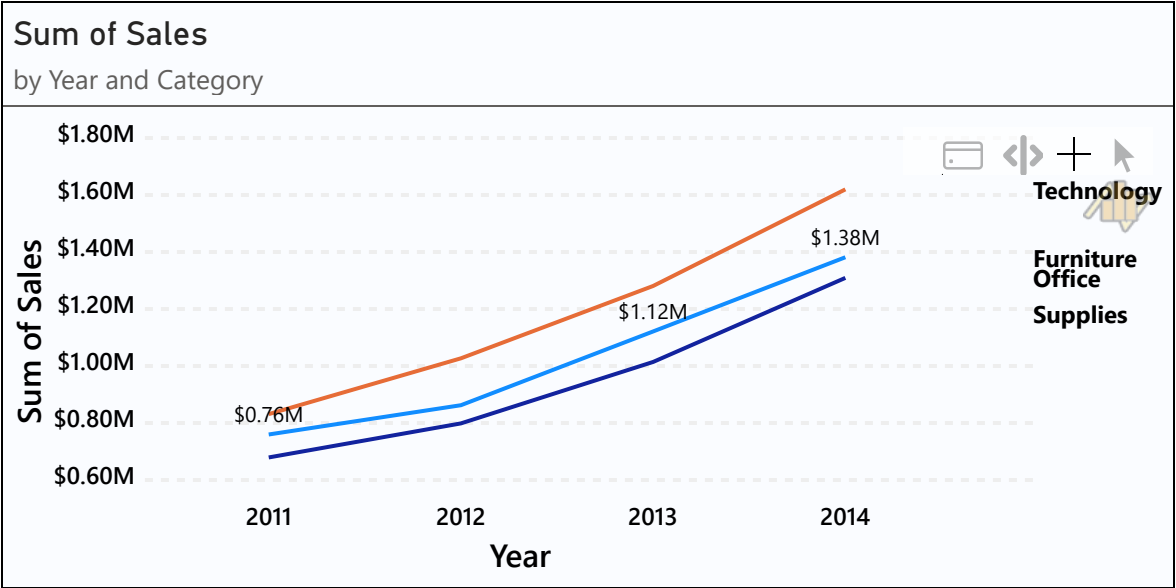

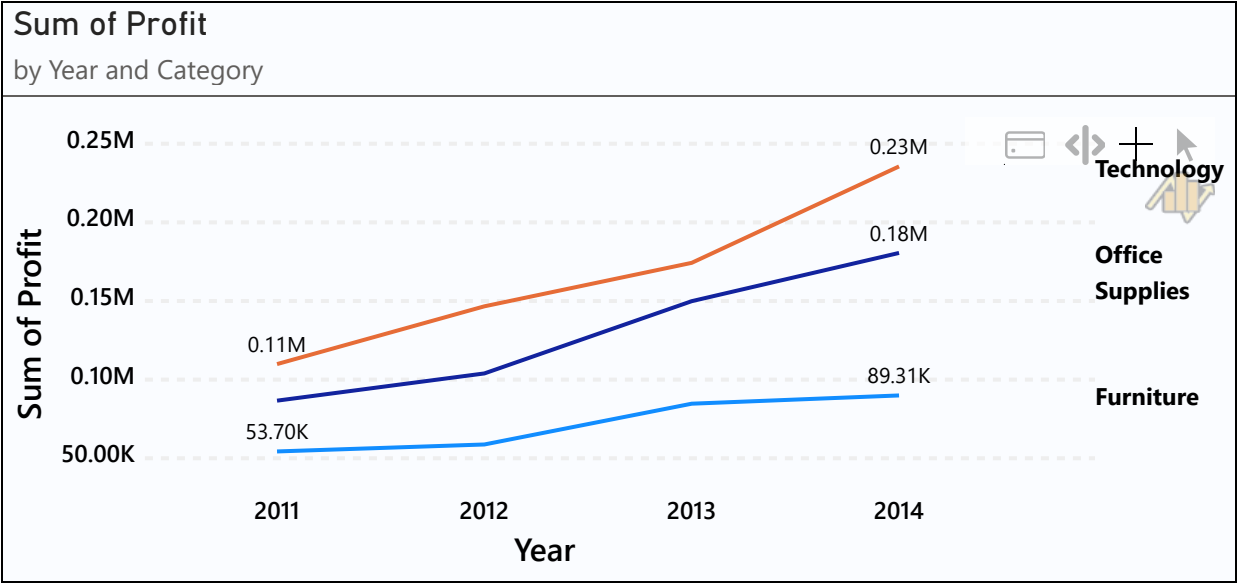

What is the overall trend in sales over time? Are there any seasonal patterns?

The overall trend in sales is increasing over the year, indicating growth. There are noticeable seasonal patterns, with sales peaking during spring and fall. This suggests that these seasons may have factors contributing to higher sales, such as promotions or increased consumer demand.

Which product category is the most profitable? Which one is the least profitable?

It has been observed that over the years, the Technology category has consistently achieved the highest sales and profitability. However, there is a contrasting relationship between Furniture and Office Supplies. Furniture has the least profit over the years, while Office Supplies have the lowest sales.

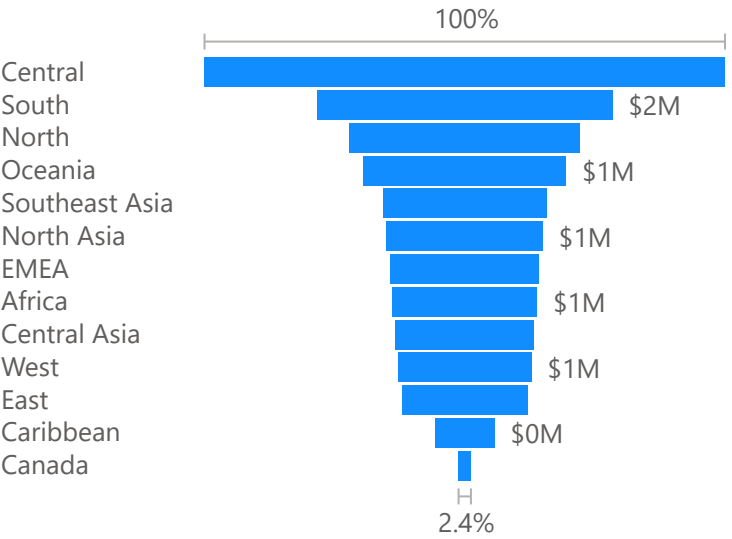

Which region generates the highest sales, and which one has the lowest sales?

As shown by the funnel chart, the Central region has the highest sales, while Canada has the lowest. This is due to population density differences; higher population density often leads to higher sales. The population density in Canada is much lower than in the Central region.

Sum of Sales by Region

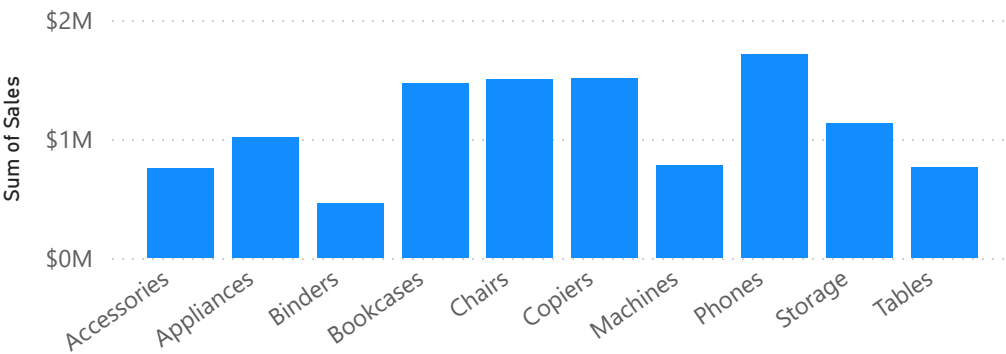

Is there any correlation between the country and profit? Explain.

Yes, there is a correlation between countries and sales. The most important factor influencing this correlation is the population of the countries. As shown by the map chart above, countries with higher populations have a higher number of sales, simply because there are more potential buyers. And generally more sales leads to higher profits.

What are the top 10 best-selling products by sales revenue?

Below is a chart to show the top 10 best selling products.

Top 10 Products
