% of Total Sales and % of Total Profit by Weekday

Key Insights:

Top Performing Days (Sales & Profit %)

- **Thursday** and **Friday** stand out:
- **Highest total profit** is on **Thursday**: \$278K+
- **Highest total sales** is on **Friday**: \$2.32M+
- Both days contribute **more than 17% each** to the **total sales and profit**.
- These are your **best days to focus promotions or high-value operations**.

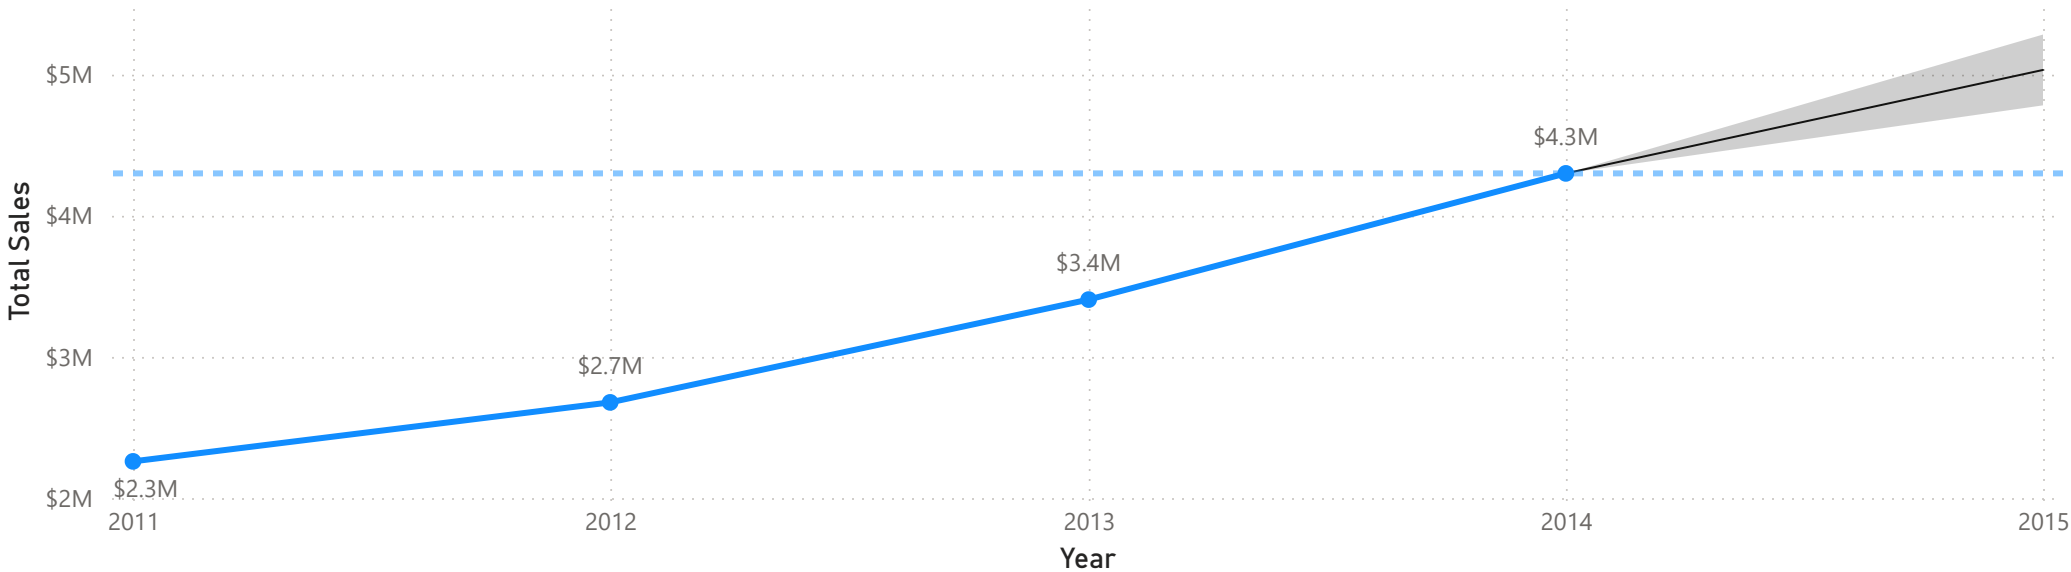

Mid-Range Days

- **Monday to Wednesday** have **very similar performance**:
- Contribute **~17% each** to sales and profit
- Indicates **stable but not outstanding** activity
- Consistent demand — could be good for testing small offers or operational tweaks.

Low Performing Days

- **Saturday** and especially **Sunday** are significantly lower:
- **Saturday** has ~9% of total sales and profit
- **Sunday** is extremely low — just **1.7% of sales** and **2% of profit**
- Sunday = **lowest engagement**
- Could mean fewer orders, fewer staff on schedule, or customer inactivity.

Total Sales by Year

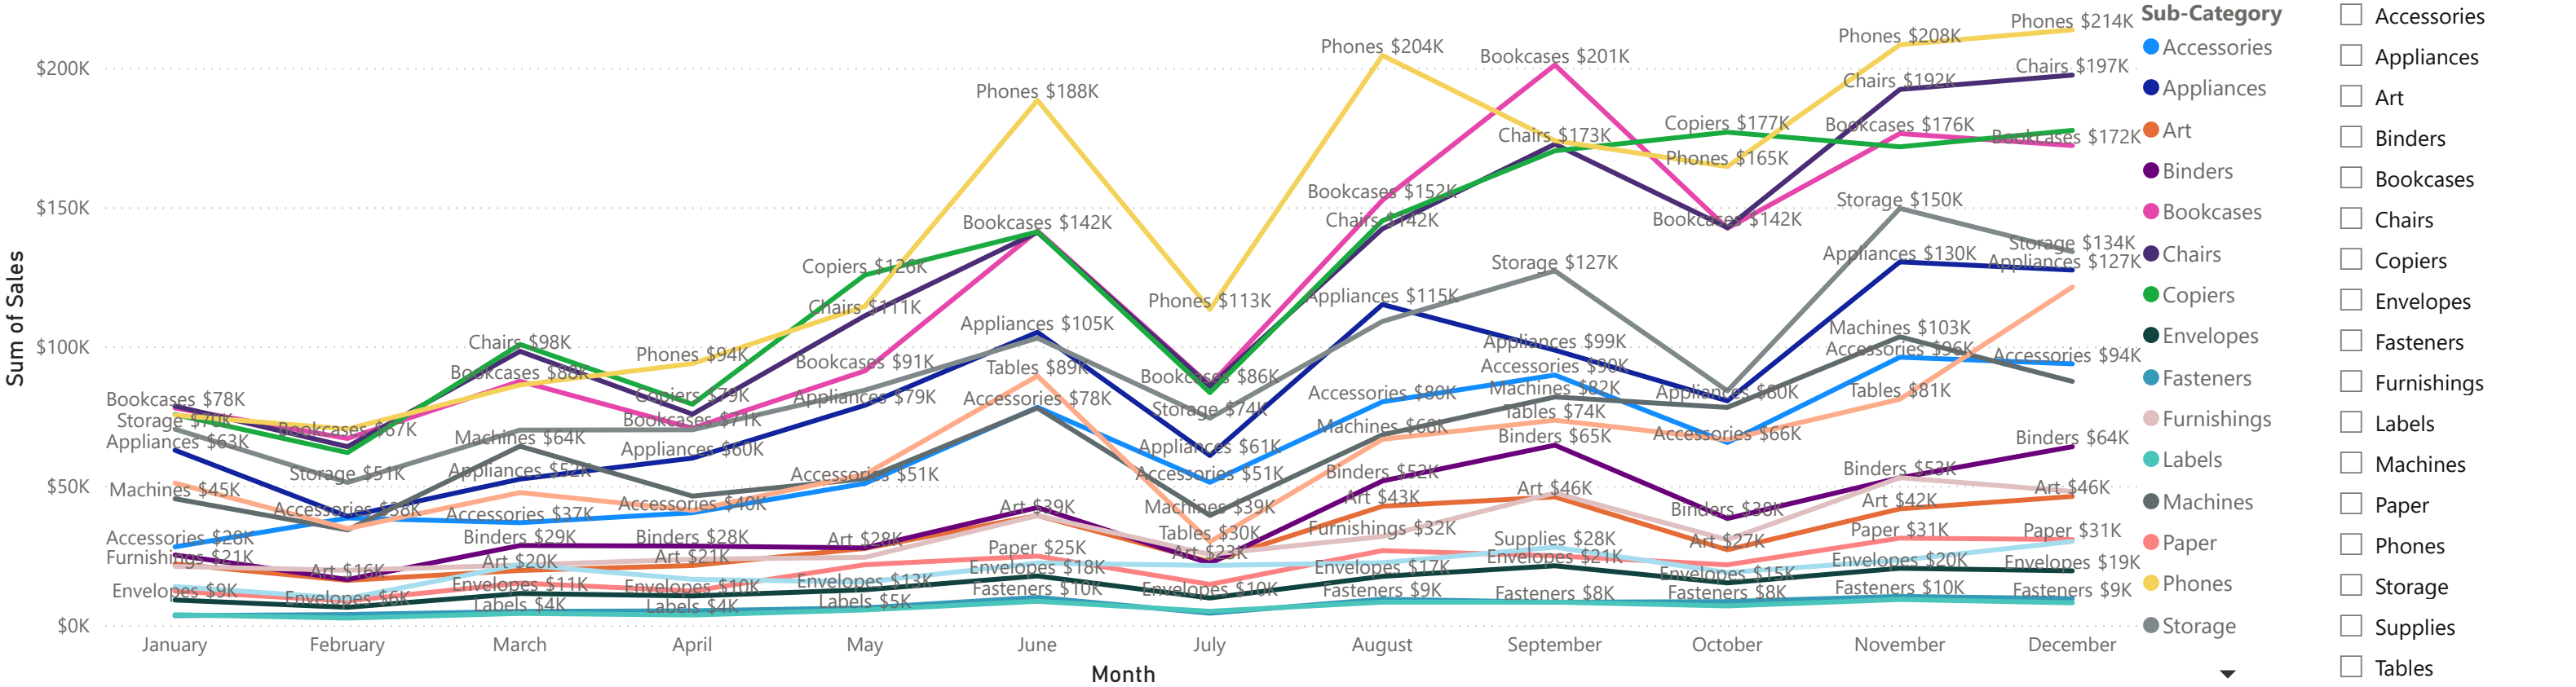

Weekday	Total Sales	Total Profit
Thursday	\$2,245,836.64	\$278,366.43172
Friday	\$2,322,847.87	\$276,753.96724
Monday	\$2,235,913.42	\$251,746.55626
Tuesday	\$2,268,417.17	\$251,164.39382
Wednesday	\$2,169,218.45	\$242,405.56156
Saturday	\$1,177,963.90	\$137,489.06816
Sunday	\$222,304.46	\$29,531.31252
Total	\$12,642,501.91	\$1,467,457.29128

Sum of Sales by Month and Sub-Category

Highest Sales Sub-Category

- Peaks sharply in **June (\$188K)** and **August (\$204K)** — likely **seasonal demand or promotional events**.
- Consistently the top performer across multiple months.
- Consider boosting **inventory and marketing** in these months.
- **November and December** showed higher sales likely because of **Black Friday and Christmas Sales**.

Strong Consistent Performers

- **Bookcases:** Peaks in **September (\$201K)** and **June (\$142K)**
- **Chairs:** Very strong in **September–December**, peaking at **\$197K in December**
- Could relate to **office/furniture upgrades** at mid-year and end-of-year budgeting cycles.
- Start of school term.

Mid to High Performers

- **Copiers** spike in **September (\$177K)** and December.
- **Storage** has a gradual increase toward **Q4**, especially **October–December**.
- Consider these for **B2B promotions** toward the end of the fiscal year.

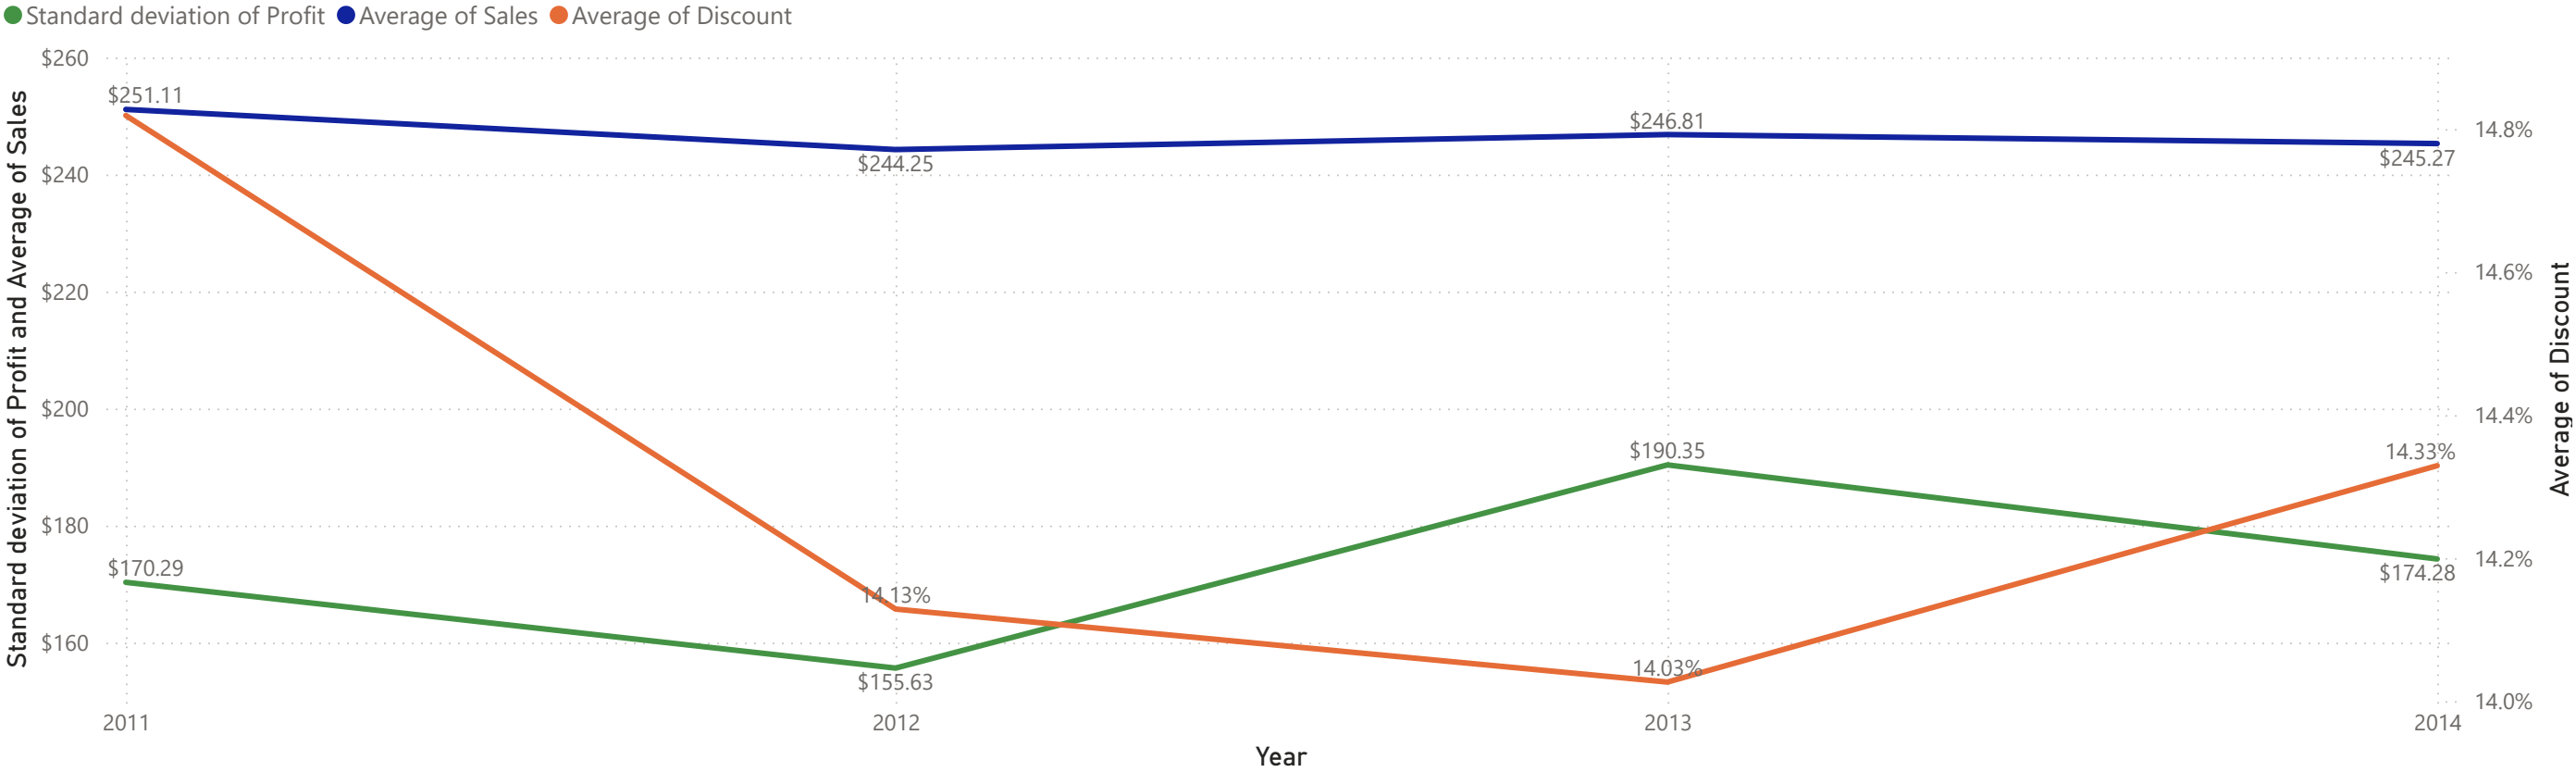

Consistent but Low Performers

- **Appliances and Accessories** Maintain a steady sales trend between **\$50K–\$127K**.
- Could be optimized with **bundling or cross-selling** tactics.
- **Envelopes, Fasteners, Labels, and Paper** were consistently at the bottom of the sales spectrum. These might be **low-margin, low-interest** - evaluate if marketing and other expenses are justified.

Monthly Trends

- Peak Months:**
 - **June, September, and December** show spikes across multiple categories. Likely tied to **mid-year budget usage, back-to-school/business, and year-end spending**. These months are perfect for **targeted campaigns, discounting, or new launches**.
- Slow Months:**
 - **January–March** are quieter across the board — post-holiday dip.

Standard deviation of Profit, Average of Sales and Average of Discount by Year

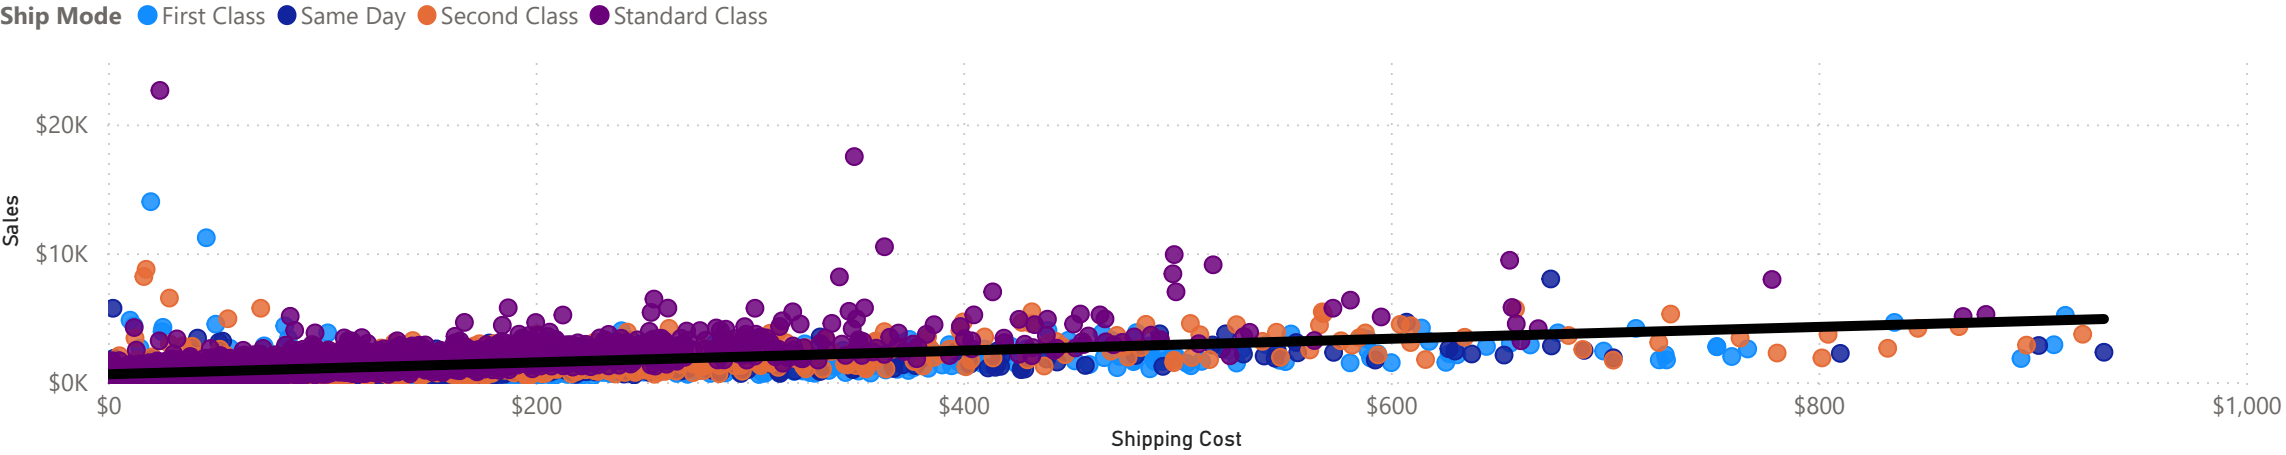

Discount, Sales, and Profit

Effect of discount on sales and profit.

Discount Range	Total Sales	Total Profit
0-10%	8955030	\$2,108,885
11-20%	1757261	\$173,255
21-30%	382555	(\$21,156)
31-40%	701343	(\$166,115)
41-50%	474688	(\$214,829)
51%+	371625	(\$412,582)
Total	12642502	\$1,467,457

Total	100.00%	100.00%

Total Sales by Discount

Key Insights:

Low Discounts (0–10%) Are Most Profitable

- Contribute **70.83% of total sales**.
- Generate **143.71% of total profit**, meaning **they offset the losses from other brackets**.
- These are clearly the sweet spot — **high volume + high profitability**.

High Discounts Lead to Losses

- Discounts **above 20%** contribute **only 15.27% of sales** but cause a **total profit drop of -55.52%**.
- Especially the **51%+ discount range**, which:
- Brings only **2.94% of sales**.
- Creates **-28.12% loss** in overall profit.
- Suggests **deep discounts are hurting the business**.

Middle Discounts (11–20%) Are Neutral

- These are **mildly profitable (11.81%)** and **contribute a fair share of sales (13.90%)**.
- Not bad, but don’t contribute significantly to profit.

Key Insights:

Sales Volume by Discount

- You can clearly see **the highest sales volume occurs at or near 0% discount**.
- There’s a **sharp drop in sales as discount increases**, with occasional minor spikes — possibly from specific promotional events or bulk orders.
- This **validates the pattern from the table**: Low discount = high sales.

Recommendations:

- **Focus on low-discount strategies** (0–10%) — they deliver both volume and profit.
- **Avoid offering discounts above 30%** unless strategically planned (e.g., clearance).
- Consider analyzing by **product category + discount range** to identify if any specific product is causing high-discount losses.
- Use these insights to **optimize your pricing and discount strategies** for future promotions.
